TIMOTHY SEBASTIAN DARMAWAN

ABOUT ME

A highly motivated, detail-oriented **Cyber Security student** at **Bina Nusantara University** and Science Major graduate from SMAK 1 BPK Penabur with professional fluency in English (IELTS Band 8.0). Eager to apply analytical problem-solving, backend development, and systems capabilities to application security, threat detection, DevSecOps, and network protection. Proven quick learner dedicated to mastering digital defense principles, building software, and taking organizational leadership.

EXPERIENCES & PROJECTS

2026 — Cybersecurity & DevSecOps Lead

- **Nolen Lead:** Authored threat model, telemetry security requirements, detection-as-code rules (MITRE ATT&CK), SSH-compromise correlation; verified with 52 automated tests.
- **Sentinel Platform:** Architected developer-oriented scanning platform detecting exposed secrets, code vulnerability risks, severity ranking, line-level remediation guidance, and scan history API.

February 2026

- **BackEnd Developer for BNCC Final Project TPM:** Engineered registration, authentication, dashboard services, and Prisma database logic for a hackathon platform.

July 2026 — August 2026

- **Head of Committee / PIC (BNCC HRD):** Led a 6-person organizing team directing the 3-week ADP

EDUCATION

• 2025 ~

Bina Nusantara University
Bachelor of Cyber Security Major
Expected Graduation: 2029 | Focus on AppSec, Network Defense, DevSecOps & Scientific Computing

• 2022 - 2025

SMAK 1 BPK Penabur Jakarta
Science Major
Strong analytical STEM foundation & high English proficiency

• 2019 - 2022

SMPK IPEKA Puri

• 2013 - 2019

SDK IPEKA Puri

SKILLS & CREDENTIALS

- **Proficient in English** with professional fluency (**IELTS Overall Band 8.0**).
- **Cyber Security & DevSecOps:** AppSec threat modeling, MITRE ATT&CK, detection engineering, secret scanning, Trivy, SonarCloud, GitHub Actions.
- **Backend & API Development:** Node.js, Express.js, Prisma ORM, REST APIs, JWT authentication, MariaDB / PostgreSQL.
- **Systems & Self-Hosting:** Linux (Arch Linux, NixOS, Fedora), system

Adobe After Effects Learning Program.

November 2025 ~ Present

- **Activist of BNCC (Bina Nusantara Computer Club):** Research & Development (R&D) & Human Resource Development (HRD). Practiced Node.js, Express, Prisma, JWT authentication, and proposed DevSecOps CI/CD pipelines (GitHub Actions, SonarCloud, Trivy).
- **Activist of PO (Persekutuan Oikumene):** Tracked weekly small group progress, reminded leaders to submit updates, and supported internal group accountability.
- **Member of CSC (Cyber Security Community):** Active member in campus cybersecurity peer community focused on digital defense and knowledge sharing.
- **Member of ISG (ISACA Student Group):** Participated in ISACA student events and ARISE IT Audit Bootcamp.

2025 — Present

- **LifeOS Infrastructure:** Built Oracle Cloud A1 Flex Linux server with Tailscale encrypted mesh network and Syncthing cross-platform synchronization.
- **AI Speaker (SMA Wardaya):** Guest speaker presenting AI fundamentals, societal impact, and technology ethics to Grade 11 students.

July 2024 - January 2025

- **Member of YCC SMAK 1 Organization:** Assisted weekly student fellowship events and operational planning.
